CLEANWISE JOINS FORCES WITH GCA SERVICES

MARLBOROUGH, MA—**Cleanwise, Inc.**, the industry-leading facility supplies procurement management company, recently signed a long-term contract with **GCA Services Group of Conshohocken, PA**, to design and implement a customized procurement portal to manage their janitorial supplies spend.

“We are delighted to have been chosen by GCA Services Group for this strategic role in their business,” said Keith Alsheimer, President of Cleanwise. “GCA Services Group represents the future of the building service contracting industry. GCA is one of today’s most innovative and fastest growing facility services companies and we are very excited about working together to create new standards of excellence within the industry.”

The Cleanwise Procurement Management System, called **eSpendwise**, is a web-based procurement system, which will allow GCA to streamline and control the purchasing process and, most importantly, will enable GCA to work with their existing suppliers and standard list of products. **eSpendwise** provides instant visibility of spending for each facility nationwide and allows customers to control spending by setting a budget for each location.

“When I took over my position at GCA, I made a list of all the procurement system functionality that we needed to optimize our supply chain,” said Herb Butler,

Director, Supply Chain, GCA Services. “Cleanwise was able to offer a complete, cost effective solution with a much faster time to market.”

Michael DeMarco, Vice President-Information Services, GCA Services Group, added: “Cleanwise has seamlessly integrated with our existing GCAware management system, and has provided our Operations personnel with powerful order management, budgeting, and reporting systems that are what our operators are looking for.”

To find out how **eSpendwise** can design and develop a custom procurement system for your company, contact Frank Barretta at Cleanwise, at (508) 380-7254.
